CONFERENCE HIGHLIGHTS – OUTLOOK

The conference programme will be shaped by the people whose views matter most – the audience. Conference topic ideas will be generated by discussions with delegates and leading industry experts during the course of the year.

Opening Keynote Address

The Forum offers an opening keynote and Friday morning keynote to present you a general economic summary, a micro view to the actual situation in the banking industry and an outlook of future matters.

Simon Taylor is helping clients understand the market and use a start-up approach to building propositions and getting them in the hands of customers. He advises governments, regulators and some of the world's largest banks, financial institutions and corporations on how Fintech, Blockchain and DLT will impact their business in the short, medium and long term. His experience led Blockchain Research and Development at Barclays, where Barclays became the first bank in the world to perform a live trade finance transaction over a Blockchain / DLT with a real customer attached.

Conference

The programme will be designed to include an interactive exchange of information on hot topics and latest trends which will inspire attendees, provide them with new ideas and key points to take away and implement within their organisations.

The conference programme will consist of workshops, think-tanks and personal development sessions based on feedback from our attending delegates.

Discussion Group

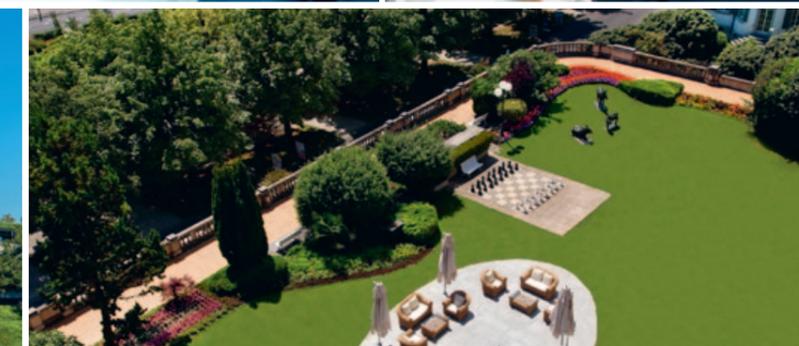

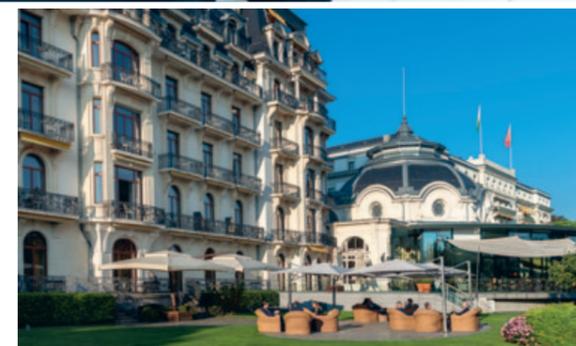

Several discussion groups will feature small numbers of senior professionals based on key themes. All group sessions will be led by expert moderators to give a high-level view of the industry, offering ideas and insights to help develop new strategies and goals.

Supplier Presentations

All suppliers have the chance to submit a supplier presentation. Delegates will evaluate and choose those presentations of most interest and relevance to them. The highest-rated presentations will be included in the conference programme.

Out of the box

Always a great way to think in a different matter – get new experience and use this way as an advantage in your business environment!

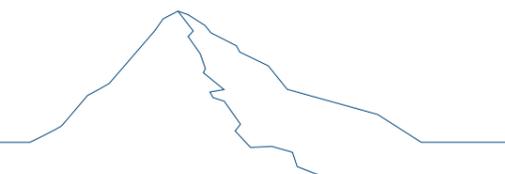

“Well organized and structured fair for the financial industry – all involved gain value of the 2 days invested.”
